ROCO9 Ltd Announces Strategic Partnership with Agrex Eco

ROCO, a leading name in Hybrid Electric crushing and screening machinery are delighted to announce its strategic partnership with AGREX-ECO, a respected equipment supplier in Poland. This collaboration marks a significant milestone in enhancing global capabilities to deliver innovative, practical, and sustainable solutions to the Polish industry.

This partnership marks a significant milestone in ROCO's ongoing European expansion strategy and strengthens the company's presence in the Central and Eastern European market. Under the new agreement, AGREX-ECO will represent ROCO exclusively across Poland, providing sales, service, and support for ROCO's full range of mobile crushing and screening solutions.

"We are delighted to welcome AGREX-ECO to the ROCO dealer network," said Shane Connolly, Managing Director of ROCO. "AGREX-ECO has built an excellent reputation for quality and customer service in Poland's recycling and aggregates sectors. Their commitment to innovation, waste management and sustainability aligns perfectly with ROCO's mission to deliver efficient, environmentally conscious equipment to our global customers."

With this partnership, Polish customers will gain access to ROCO's industry-leading machinery, hybrid electric ICON 1100 impact crusher, RYDER 1000 jaw crusher & SPRINTER 1500 screening scalper as well as support, spare parts and tailored solutions for quarrying, construction, and recycling applications.

"We are thrilled to join forces with ROCO," said Jacek Zawadzka, CEO of AGREX-ECO. "ROCO's dedication to quality engineering and eco-friendly design perfectly complements our company values. Together, we aim to provide Polish operators with cutting-edge equipment and exceptional aftersales service."

This partnership underscores ROCO's ongoing commitment to expanding its global footprint and offering localised support through trusted regional partners.
